DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 9/20/2010 have been fully considered but they are not persuasive.
2. Applicant argues, see page 3 of the remark, "...only original audio data of the one block are read out with video data not read out" is supported in the specification at page 11, lines 4 to 7 and page 56, line 23 to page 57, line 4. The examiner disagrees.
3. First, as shown in figure 16, the main sequence only has data blocks from G10 to G31. Data blocks from G50 to G70 are not in the main sequence. Video data block in the main sequence within M data block, for example G11, has to be read out, in order for the video to be seen. Second, "only original audio data of the one block are read out with video data not read out" is not included in the sequence order (1) to (4) in the specification at page 11, lines 12 to 18.

Specification

4. The amendment filed 9/20/2010 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Amendment to the specification filed on 9/20/2010 changes "recorded" to "reproduced". These two processes are opposite and can not be interchanged.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1 and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1, there's no disclosure for "only original audio data of the one block are read out with video data not read out". First, as shown in figure 16, the main sequence only has data blocks from G10 to G31. Data blocks from G50 to G70 are not in the main sequence. Video data block in the main sequence within M data block, for example G11, has to be read out, in order for the video to be seen. Second, "only original audio data of the one block are read out with video data not read out" is not included in the sequence order (1) to (4) in the specification at page 11, lines 12 to 18.

Claim 4 is also affected.

Allowable Subject Matter

Claims 1 and 4 would be allowed if 35 U.S.C 112 rejections are overcome.

Art Unit: 2484

There's no new ground(s) of rejection. Accordingly, THIS ACTION IS MADE FINAL. See MPEG § 706.07 (a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136 (a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing data of this action. In the event a first reply is filed within TWO MONTHS of the mailing data of this action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period. Then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing data of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the data of this final action.
